**ABSTRACTED-PUB-NO:** JP2000115619A

**BASIC-ABSTRACT:**

NOVELTY - The image pick-up direction and the zoom scale factor control instruction of the camera are input, based on which the area photographed by the camera is computed. A limiter (113) restricts the control range of zoom scale factor, when computed area overlaps with a preset area. When the zoom scale factor exceeds the limited control range, a controller maintains zoom scale factor to be within limits.

DETAILED DESCRIPTION - A memory (115) stores the limitation information of control range of zoom scale factor of camera, corresponding to the preset area. INDEPENDENT CLAIMS are also included for the following:

- (a) remote controlling procedure of camera;
- (b) camera control program

USE - For controlling image pick-up direction, zoom scale factor etc., of camera in remote place, via network.

ADVANTAGE - Remote camera controller without infringing on privacy is obtained.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of remote controller for camera.

Limiter 113

Memory 115
